

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that the people of today want to hear. We deserve the kind of service that satellite radio, in particular XM Satellite Radio, brings to the world. This is cutting edge technology at its best and it should not be stifled because some broadcasters feel threatened by the success of satellite radio! They should embrace satellite radio and take their own services to the next level.

Respectfully,

Cecilia A. McMillian
